Problematic

The city as an urban area plays a crucial role in implementing policies for in sustainable urban development. It assumes responsibility of a political; cultural, health-related; social, commercial; and economic nature of its citizens.

To ensure the well-being of its citizens, the city implements policies focusing on improving and modernizing administrative systems. These policies aim to address the needs and concerns of the population, while emphasizing the principles of participation, consultation, and transparency. Achieving these goals requires Inter-sectorial collaboration among various stakeholders, including the government, private sector, investors, civil society, and the citizens themselves.

The importance of this collective approach is highlighted in the national plan, which emphasizes the need for cooperation and coordination among all actors to achieve sustainable urban development.

Objectives

- Raising public awareness of the challenges facing Algerian cities.
- Providing information on spatial practices and their impact.
- Encouraging reflection on the challenges and prospects for the future.
- Encouraging citizen participation in urban projects
