Geology is the science that allows, among other specialities, to highlight and enhance the country's richness. This science was developed because of man's need for energy, and materials used to survive. It deals with understanding the mechanisms that promoted these resource occurrences and to predict the zones or the depths where they can be found and possibly extracted.

The North of Africa is individualised by these Maghrebides mountain belts, limited to the South, by the immense Sahara Desert, known for its underground riches. To the North, metamorphic formations aged Palaeozoic, or even earlier, testify to a dynamic and a complexed geological history that is part of the global tectonics. The sedimentary formations are represented, in particular by the limestone chain of the Kabylean ridge (dorsal Kabyle), whose reliefs culminate in the Djurdjura peaks and make the beauty of the landscapes from to the eastern region. Magmatic rocks of different ages known to generate wealth flow and intersect these formations in different places.

To the South, the geology of the Sahara is characterised by the complexity of geological structures, resulting from a long geological history. This structural complexity presents a favourable environment, allowing a diversified natural resource. These are represented in particular by hydrocarbons, mineral resources and underground water.

Many researchers have conducted many studies to describe and to evaluate its economic significance, based on petrographic, structural, sedimentological, geochemical, hydrogeological, geophysical and geomatic studies.

This first international virtual seminar concerns different fields of geoscience. It will bring together geoscientists from all over the world for a meeting covering all disciplines of the earth and universe sciences, with the aim of deepening knowledge and exchanging experiences, new discoveries between researchers. An electronic platform will serve as a

Any abstracts do not comply with the instructions to the authors will be rejected.

The author has the right to participate with a maximum of two different communications.

The same abstract submitted to more than one theme is not allowed, and will be rejected.

The short abstract should be (200-300 words), clear, concise, and written in English, Arabic or French with correct spelling and good sentence structure.

The long abstract must be written in English, Arabic or French, and must not exceed 10 Mb

The character "Times New Roman 10";

Normal margins 2.5 cm on each side;

Line spacing is simple (0 spaces and 0 indents);

The title of the manuscript "in bold" and "in capital letters" in the character "Times New Roman 11";

The author's first and last name followed by the co-authors must appear immediately below the title in capital letters and full without any abbreviations, followed by affiliation and email address.

Photos or figures must be legible, clear, block-like and not assembled by text boxes.

The mathematical formulas will be inserted as an image.

A list of bibliographic references at the end of the document and in alphabetical order.

The abstract is limited to a maximum of 04 pages, including figures and tables.

See the model here the template is attached to [the Link](#)

Conduct of the seminar and rules

Authors can communicate their presentations to the organisers before the event in case there are connection problems.

Return to communication if you want add the second communication

Once the registration is done, send your short or extended abstract to the email address

1svigc2023@gmail.com

The screenshot shows a website for the "1st International virtual seminar on geosciences, Constantine, Algeria". The navigation bar includes Home, About, Organisers, Themes, Cooperators, Communication, and Contact. The main heading is "PARTICIPATE WITH A COMMUNICATION". Below this, it states: "This rubric is reserved for the author of communication. Author is limited by two communications." A list of communications is shown, with one entry: "- PETROGRAPHY STUDY OF THE NUMIDIAN SANDSTONE, NORTH-EAST OF ALGERIA" with a "Delete" link. Below the list, there are links for "Add Co-authors" and "Send your file to 1svigc2023@gmail.com", with a yellow arrow pointing to the email address. The form includes a "Title of communication" input field and a dropdown menu for "Please choose a theme". A yellow "Add a communication" button is at the bottom.
