## Scientific Days on Electrical Engineering and Nanotechnology in Biomedical, Agriculture and Environmental

Organised by :  
**Laboratoire Microsystème et Instrumentation (LMI)**

### Aims And Objectives

The objective of this scientific days is to unite researchers from diverse scientific disciplines within electrical engineering and nanotechnology, fostering the exchange of among experts in biomedical, agricultural, and environmental sciences. Furthermore, it seeks to establish a direct relationship for communication among participants, encouraging continued research in these fields, while also bringing together experts on the application of electrical engineering and nanotechnologies in health, agriculture, and environmental sectors.

### Topics :

- Materials and Nanomaterials
- Electrical power systems ; plasma, electrostatics, high voltage, ...
- Sensors and Biosensors
- Optoelectronics and Photonics
- Intelligent Devices and Systems

### Important Dates

- Abstracts submission deadline: November 25, 2024
- Acceptance Notification : December 05, 2024
- Date: December 09 and 10, 2024
